		GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN	I CALIFORNIA	

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A <u>riparian right</u> enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An <u>appropriative right</u> is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x pump Method of measurement: weir 1½ C1p and	200 <u>+</u> 150 <u>+</u>	eci eci eci eci	ilore ro-fact ilone ro-fact
Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x pump Method of measurement: weir 1½ C1p and	200 <u>+</u> 150 <u>+</u>	eci eci eci eci	ilore ro-fact ilone ro-fact
Maximum annual water use in recent years. Minimum annual water use in recent years. Type of diversion facility: gravity x pump Method of measurement: weir 12 CIP flume. Purpose of use (what water is being used for)	200± 150± ., electric power meter, w	ed sc.	lines re-feet flees re-feet estimate 8
Maximum annual water use in recent years. Minimum annual water use in recent years. Type of diversion facility: gravity x pump Method of measurement: weir 12 C1p and Purpose of use (what water is being used for)	200± 150± ., electric power meter, w	ed sc.	lines re-feet flees re-feet estimate 8
Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x , pump Method of measurement: weir 12 C1p and Purpose of use (what water is being used for)	200± 150± ., electric power meter, w	ed sc.	lines re-feet flees re-feet estimate 8
Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x , pump Method of measurement: weir 12 C1p and Purpose of use (what water is being used for)	200± 150± ., electric power meter, w	ater meter,	lines re-feet flees re-feet estimate 8
Maximum annual water use in recent years. Minimum annual water use in recent years. Type of diversion facility: gravity x pump Method of measurement: weir 12 C1p and Purpose of use (what water is being used for)	200± 150± ., electric power meter, w	ater meter,	lines re-feet flees re-feet estimate 8
Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x , pump Method of measurement: weir 12 C1p and Purpose of use (what water is being used for)	200± 150± ., electric power meter, w [rrigation] sketch of section grid on reverse of	ater meter	line re-feet flees re-feet estimate ==
Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x pump Method of measurement: weir 12 Cip and Purpose of use (what water is being used for) General description or location of place of use (use of Section 3, T78, R32E, MDB6M Year of first use as nearly as known 1885 Name of person filing statement Position Chief Engineer of Water Co	200± 150± ., electric power meter, w [rrigation] sketch of section grid on reverse of	ater meter,	line re-feet flees re-feet estimate ==
Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x pump Method of measurement: weir 12 Cip and Purpose of use (what water is being used for) General description or location of place of use (use of Section 3, T78, R32E, MDB6M Year of first use as nearly as known 1885 Name of person filing statement Position Chief Engineer of Water Courses Works and Assistant Hanager Address	200± 150± electric power meter	ater meter	line re-feet flees re-feet estimate ==
Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x , pump Method of measurement: weir 12 Cip and Purpose of use (what water is being used for)	200± 150± electric power meter	ater meter	line re-feet flees re-feet estimate ==
Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x pump Method of measurement: weir 12°C1p and Purpose of use (what water is being used for) General description or location of place of use (use of Section 3, T78, R32E, MDB6M L Year of first use as nearly as known 1885 Name of person filing statement Position Chief Engineer of Water Courses Works and Assistant Hanager Address	200± 150± electric power meter	ater meter	line re-feet flees re-feet estimate ==
Maximum annual water use in recent years Minimum annual water use in recent years Type of diversion facility: gravity x pump Method of measurement: weir 12°C1p and Purpose of use (what water is being used for) General description or location of place of use (use of Section 3, T78, R32E, MDB6M L Year of first use as nearly as known 1885 Name of person filing statement Position Chief Engineer of Water Chiefs and Assistant Hanager Address certify that the foregoing statements afterward for	200± 150± electric power meter	ater meter	line re-feet flees re-feet estimate ==
